“10 Tips for Recovering Bad Landings”

It is probably a fair bet that everyone who has flown an airplane has made a bad landing once or twice. Murphy's Law suggests that when we do it will always be when a lot of people are watching. So let's look at some causes and some remedies to lessen the possibility of a bad landing. Bring your “war stories” and we'll all have a laugh at our occasional, but very human, lapses.
